CASPER EVENTS CENTER IMPLEMENTS NEW SECURITY PROTOCOLS

In an effort to promote public safety and guest service, the Casper Events Center will begin using metal detecting wands for public events effective beginning Dec. 12, 2016.

This security measure is one step in a long range plan to actively seek and implement policies and procedures that provide a safer and more enjoyable experience for all event attendees.

The facility management team will be working closely with local law enforcement agencies in the coming months to further identify opportunities to support safety and security in the Casper Events Center.

“We look forward to providing a superior guest experience in a safer environment for our community through these efforts,” said Spectra Venue Management’s Anna Rosburg, assistant general manager and director of marketing at Casper Events Center.

In February of 2016, the facility implemented its “Txt Alert” program as a method of facility management. The program allows the public to notify management in real time of anything that requires staff attention, including guest service concerns, suspicious activity, and more so that it can be promptly addressed.
